

# Designing Appropriate Computing Technologies for Rural Development

Tapan S. Parikh  
Department of Computer Science & Engineering  
University of Washington

Job Talk - Spring 2007

3 billion people in the rural developing world need the same information we do

- ✓ Business: new opportunities
- ✓ Finance: capital to invest
- ✓ Government: services & programs
- ✓ Health: informed, consistent care
- ✓ Education: personal advancement

## 3 billion people in the rural developing world have different limitations and capabilities

- x Money: to buy technology
- x Education: to use technology
- x Infrastructure: power, connectivity
- ✓ Time: lots of available labor
- ✓ Community: lots of relations

## Understand Context

A highly 'embedded' approach to designing, developing and evaluating technology

## Build Solution

CAM: a mobile phone toolkit for distributed data collection in the rural developing world, and several applications using it

## Evaluate Result

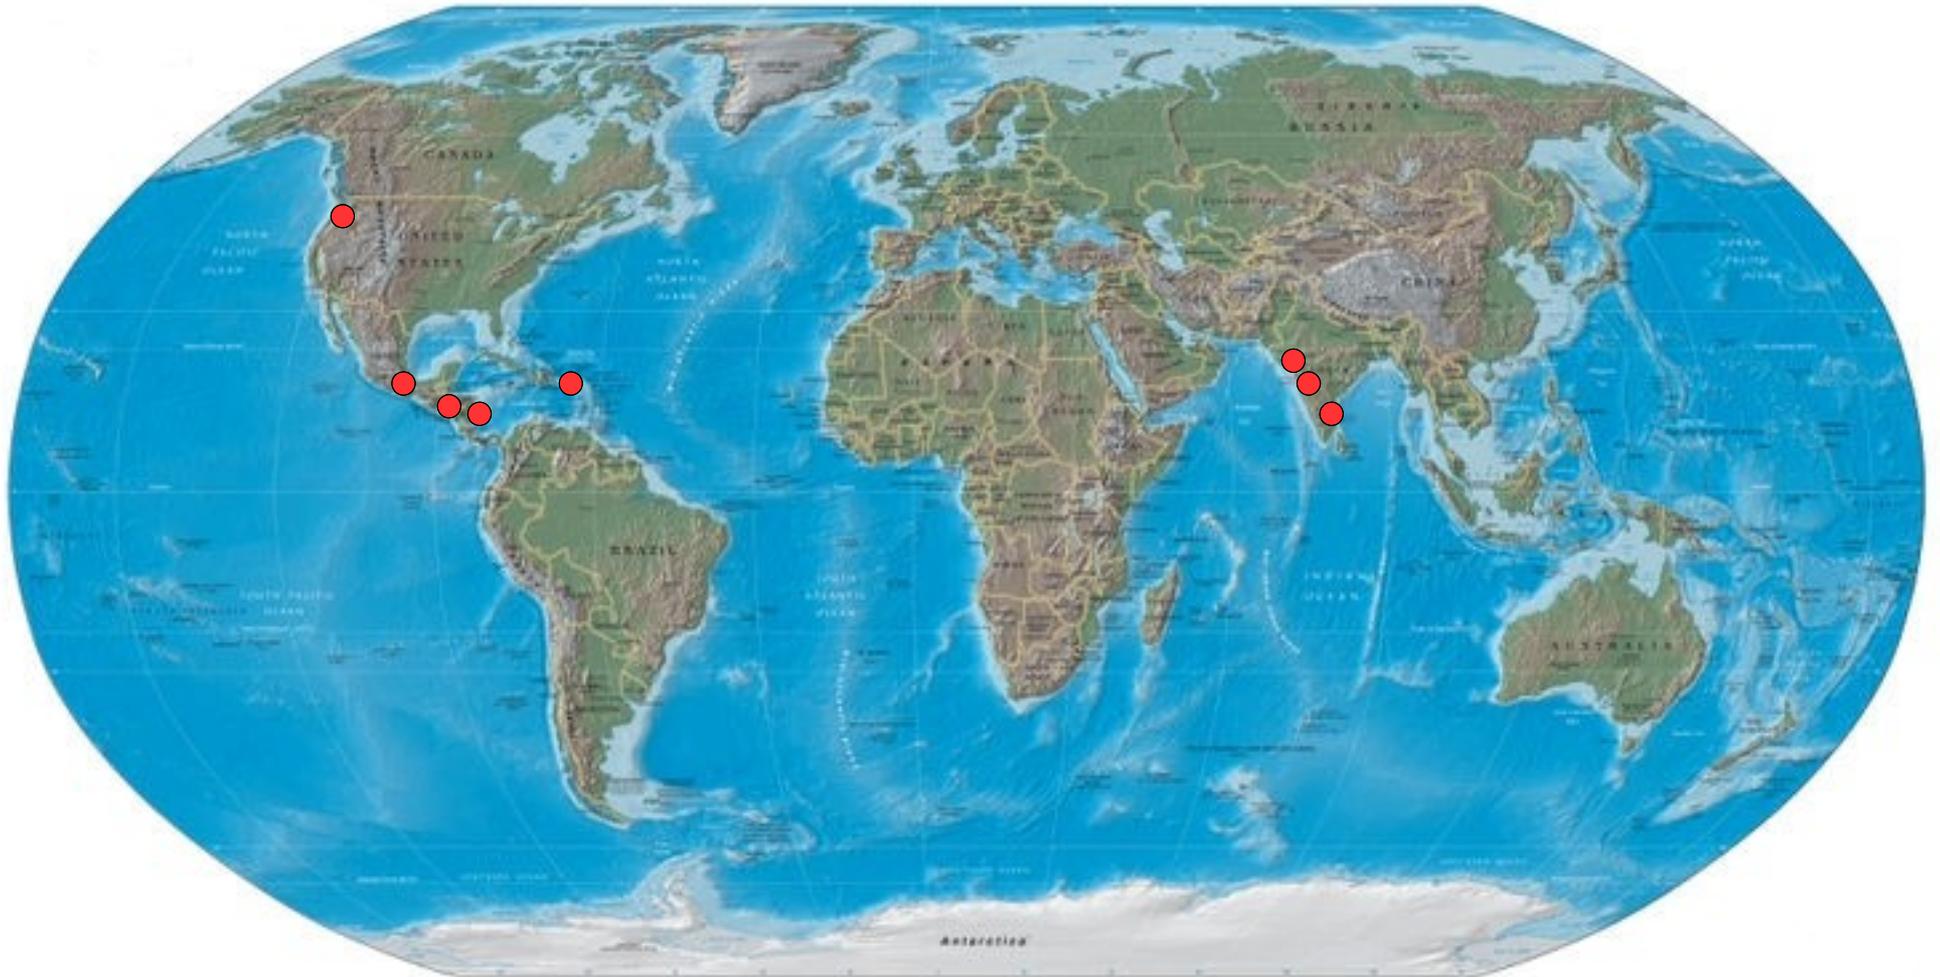

Microfinance – actively used in India

Agriculture – tested in Guatemala and India

Supply Chains – tested in India

# Step 1: Understand

2002-3

## Microfinance: Global Movement

- Grameen Bank & Muhammad Yunus – 2006 Nobel Prize

## Self-Help Groups (SHGs) - ROSCAs, ASCAs, Village Bank, etc.

- Collect savings during meetings
- Use capital for small loans
- Business, livestock, education, health care, etc.
- Repayment based on peer pressure

## Decentralize financial service provision

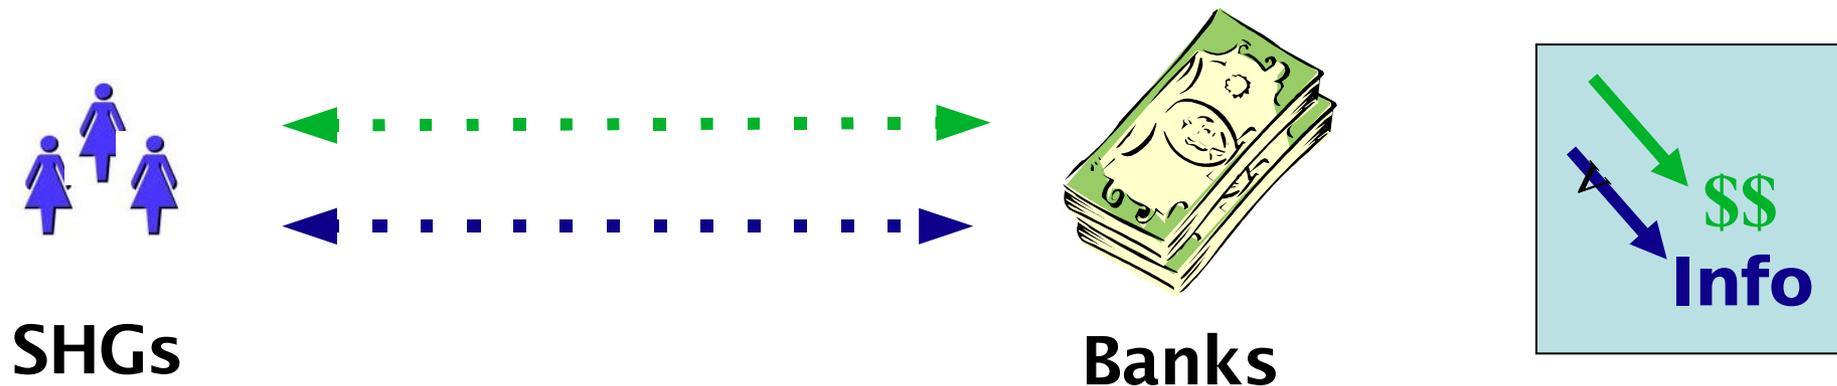

# Linking Formal and Informal

## SHGs are being linked to banks

- ✓ Access more credit at better rates
- ✓ Other services (insurance, investment, savings, etc.)
- ✓ Local intermediation can reduce cost of service
- ✓ Excellent repayment performance (90-98%)

## However, many obstacles Parikh - ICTD 2006

- x Spread across remote rural areas
- x Expensive to collect information and money
- x Documentation practices are inconsistent
- x Difficult to assess credit risk and make decisions

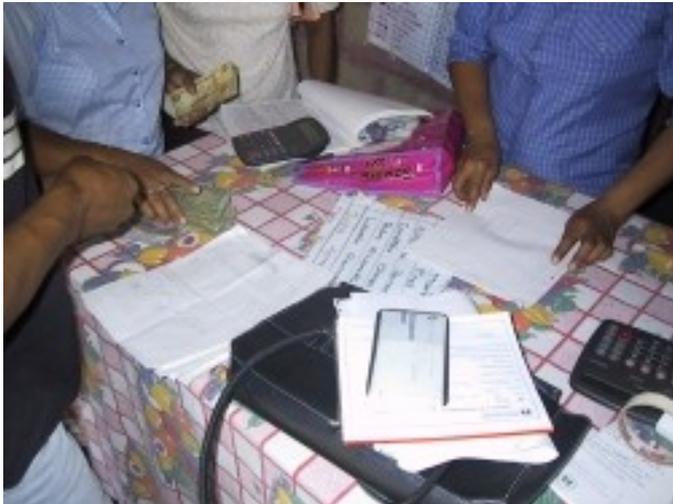

# Information can be the Bridge

## Information can bridge the divide

- Connect the formal and the informal
- Provide oversight and understanding for SHGs
- Provide credit ratings and risk analysis for banks
- Result: SHGs get better rates for better performance

## Can we design a system for SHGs to aggregate data?

- Accessible to users
- Accurate and efficient
- Intermittent power, connectivity
- Generalizes to other applications

# Design for Rural Users

Investigate interface design space for rural users

- SHG members and supporting staff
- Some may be semi-literate or illiterate
- Use SHG data collection as sample application

Only previous work was Grisedale et al., CHI 1997

- Data collection for rural health care workers in Rajasthan
- Using Apple Newton

We used laptop / PC for maximum flexibility

- Not considering real deployment issues

# contextual study

# Design Guidelines for Rural Users

Parikh et al. - ACM CHI 2003, ACM CUU 2003 (Best Paper)

Two-month iterative design study conducted in a village  
32 rural users - farm laborers (10 semi or illiterate)

- ✓ Paper formats are important
- ✓ Local language audio builds trust
- ✓ Numeric input/output is accessible
- ✓ Guide the user through the task
- ✓ Realistic icons are better

# Step 2: Build

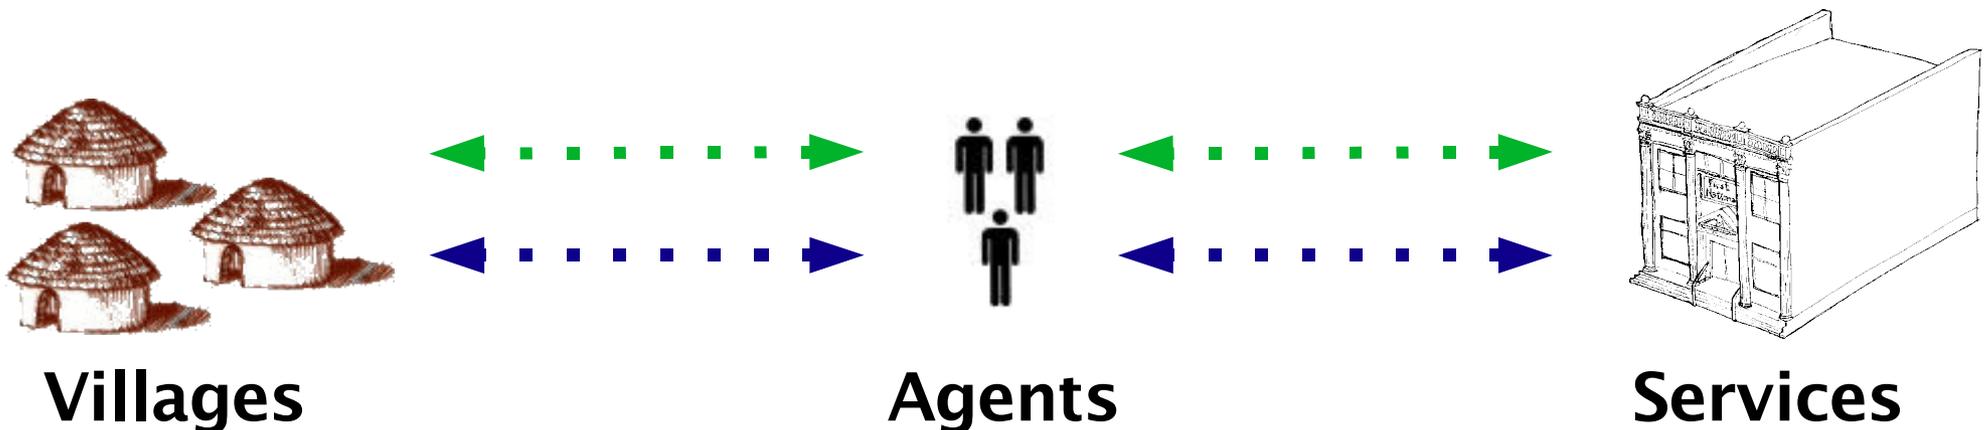

2004-5

# 1) Agents - Rural Service Providers

Agent Model: Provide services through local intermediaries

- Employ underemployed youth and women
- Convenient for users / clients (travel is hard!)
- Common motif for many services
  - Primary health care
  - Retail supply chains
  - Agriculture
  - Communications, etc.
- In microfinance, {bank, NGO} field staff collect info, repayments & deliver reports

# 2) Mobile Phones

Mobile phones are the perfect client device

- Exponential growth across developing world
- Numeric Keypad, Speakers & Microphone
- Intermittent network, Battery-operated, Low-cost
- Supports Agent-based service model

Problems and Limitations

- Small screen: adapted WIMP metaphor
- Numeric keypad: text entry is difficult
- Difficult to program applications

# 3) Paper User Interfaces

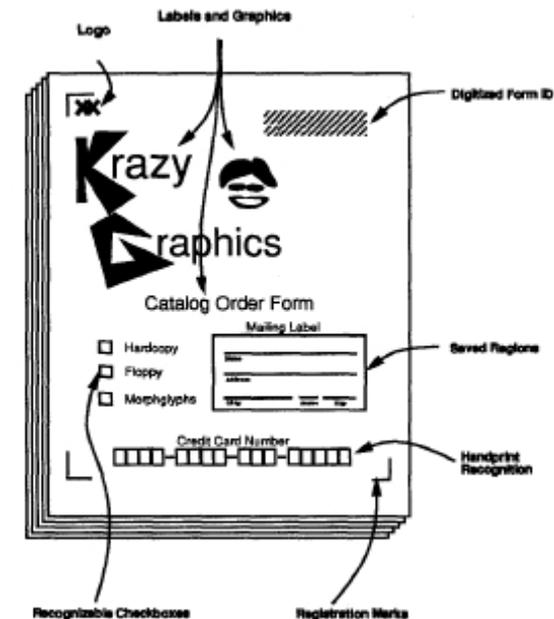

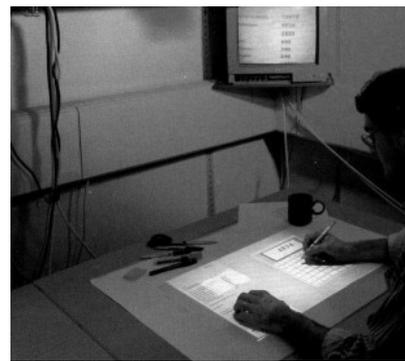

Leverage affordances of paper in digital UIs

- XAX, Digital Desk, A-Book, Paper PDA, Cooltown, Books with Voices, etc.

However, thus far these approaches have had limited impact

Rural developing world could be the killer application

- Familiarity with paper formats
- Offset high technology cost by performing some operations on paper “client”

# CAM: Application Toolkit for Mobile Phones

Parikh et al. - IEEE Pervasive 2005, WWW 2006

## CAMForms

interactive paper forms

**Formulario de Inspeccion Interna de Asobagri**

**Direcciones:** Este formulario de inspeccion consta de 12 secciones. Para ingresar una seccion al telefono, debora de ingresar el codigo de barras correspondiente, seguido del codigo del productor. A continuacion, el telefono comenzara a proporcionar el espacio para contestar las preguntas de esa seccion. Si usted quiere tomar alguna fotografia o hacer una grabacion de audio para proporcionar evidencia de su inspeccion, usted puede ingresar el codigo de barras con el titulo "tomar fotografia" o "grabar audio", respectivamente, seguido tambien del codigo del productor.

<b>Seccion 0 Informacion general</b>		90##0 tomar fotografia	91##0 grabar audio	70 Seccion 0
0.1. Codigo de	0.2. Fecha			
0.3. Cuantas parcelas tiene?	Proyeccion por parcela	a. b. c. d. e.		
<b>Seccion 1 Semillas y Tratamiento</b>		90##1 tomar fotografia	91##1 grabar audio	71 Seccion 1
1.1. Hizo 1. Si semillero?	2. No	Codigo de la parcela de origen de semillas		
1.2. Cantidad de semillas en libras:	Producto que uso para desinfectar:	1. Organica 2. Natural 3. Conversion 4. Convencional		
1.3. Que sustrato 1. Mat. uso para el Organica semillero?	2. Tierra 3. Arena	Producto que uso 1. Plantas 2. Agua Caliente 3. Quimico para desinfectar		
Recomendaciones inmediatas:				
<b>Seccion 2 Fuente de plañones y</b>		90##2 tomar fotografia	91##2 grabar audio	72 Seccion 2
2.1. Compro 1. Si almuerzo de cafe? 2. No	Estatus 1. Organica 2. Natural 3. Conversion 4. Convencional			
2.2. Sembro 1. Si algunos frutales dentro de la parcela?	Codigo de la parcela de origen: Cuales? 1. Citrico 2. Banano 3. Conversion 4. Convencional			

## CAMBrowser

mobile phone app to process forms

```
<function name="a_click">
  d = input_date("Date", "date.wav");
  i = input_int("Interest", "int.wav");
  p = input_int("Principal", "pri.wav");
  if (d & p & i)
    http_put("...");
</function>
```

## CAMScript

scripting language for form interaction

## **Tight linkage to paper practices**

- Retain paper as the authoritative local record
- Avoid abstract, menu-driven interaction
- Not optimizing for local labor – don't need OCR!

## **Simple, scripted programming model**

- Easy to program and use

## **Multimedia Input & Output**

- Capture audio and images instead of text

## **Disconnected Operation**

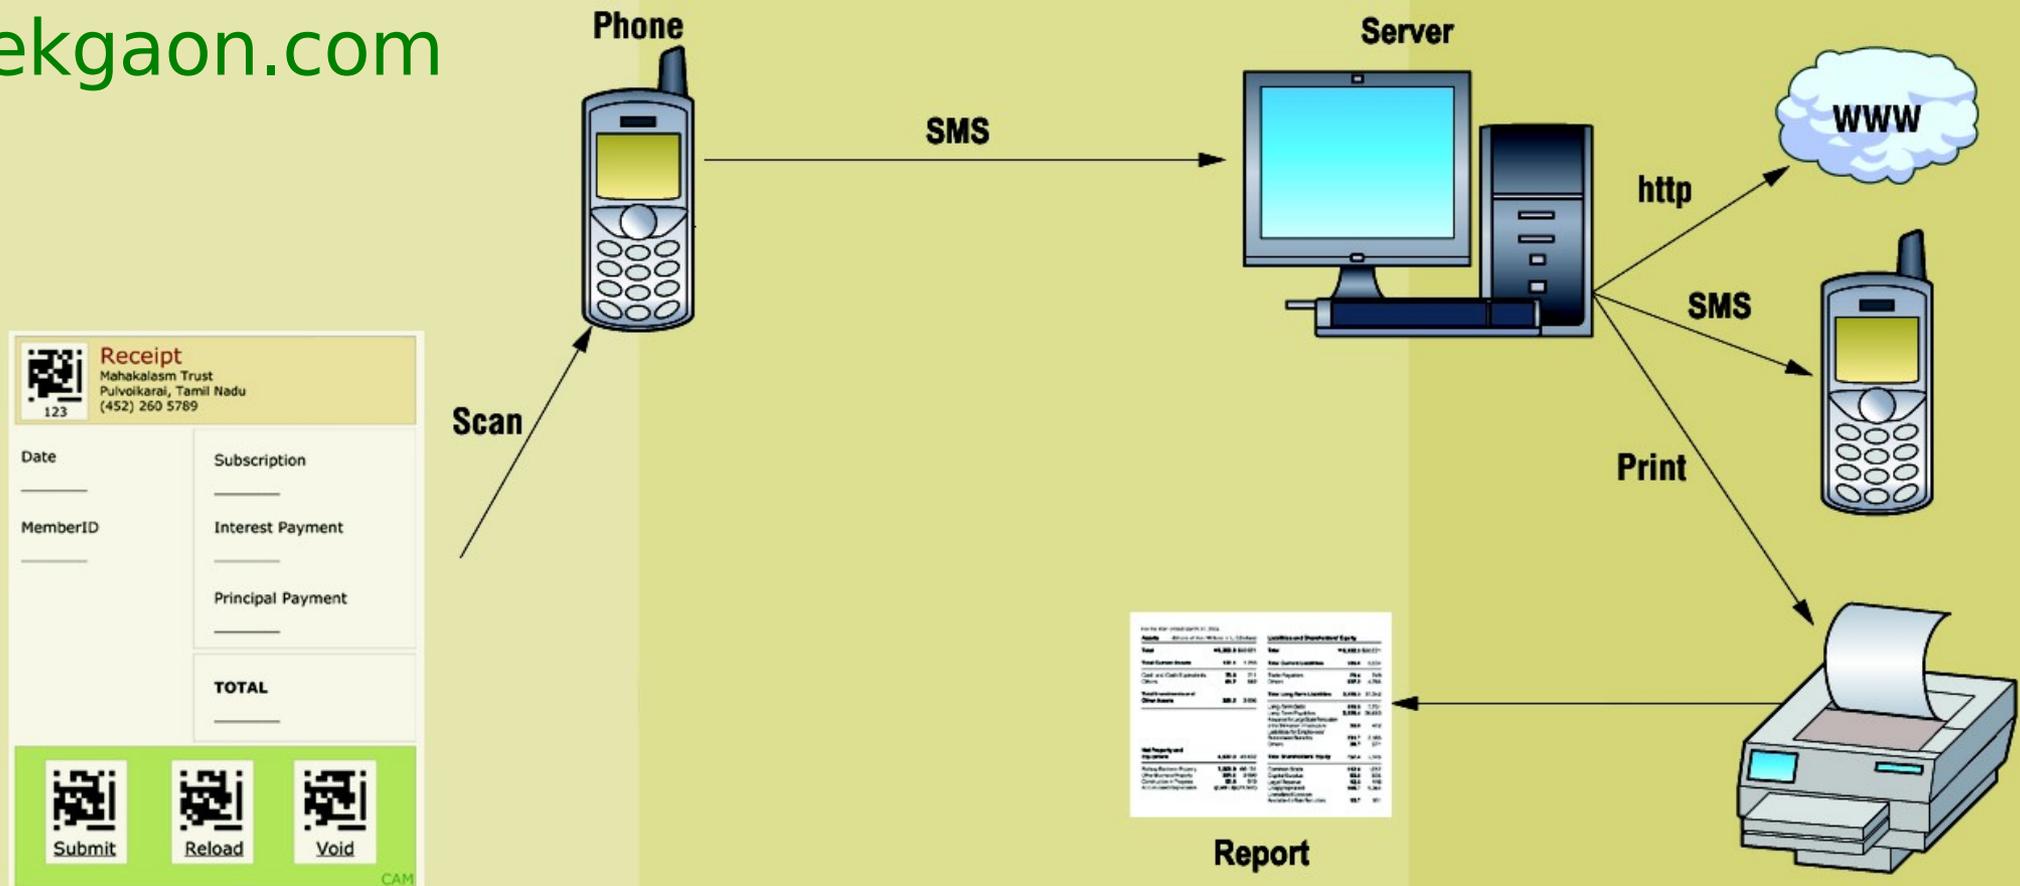

- Transfer data using SMS, MMS, Email (and HTTP)

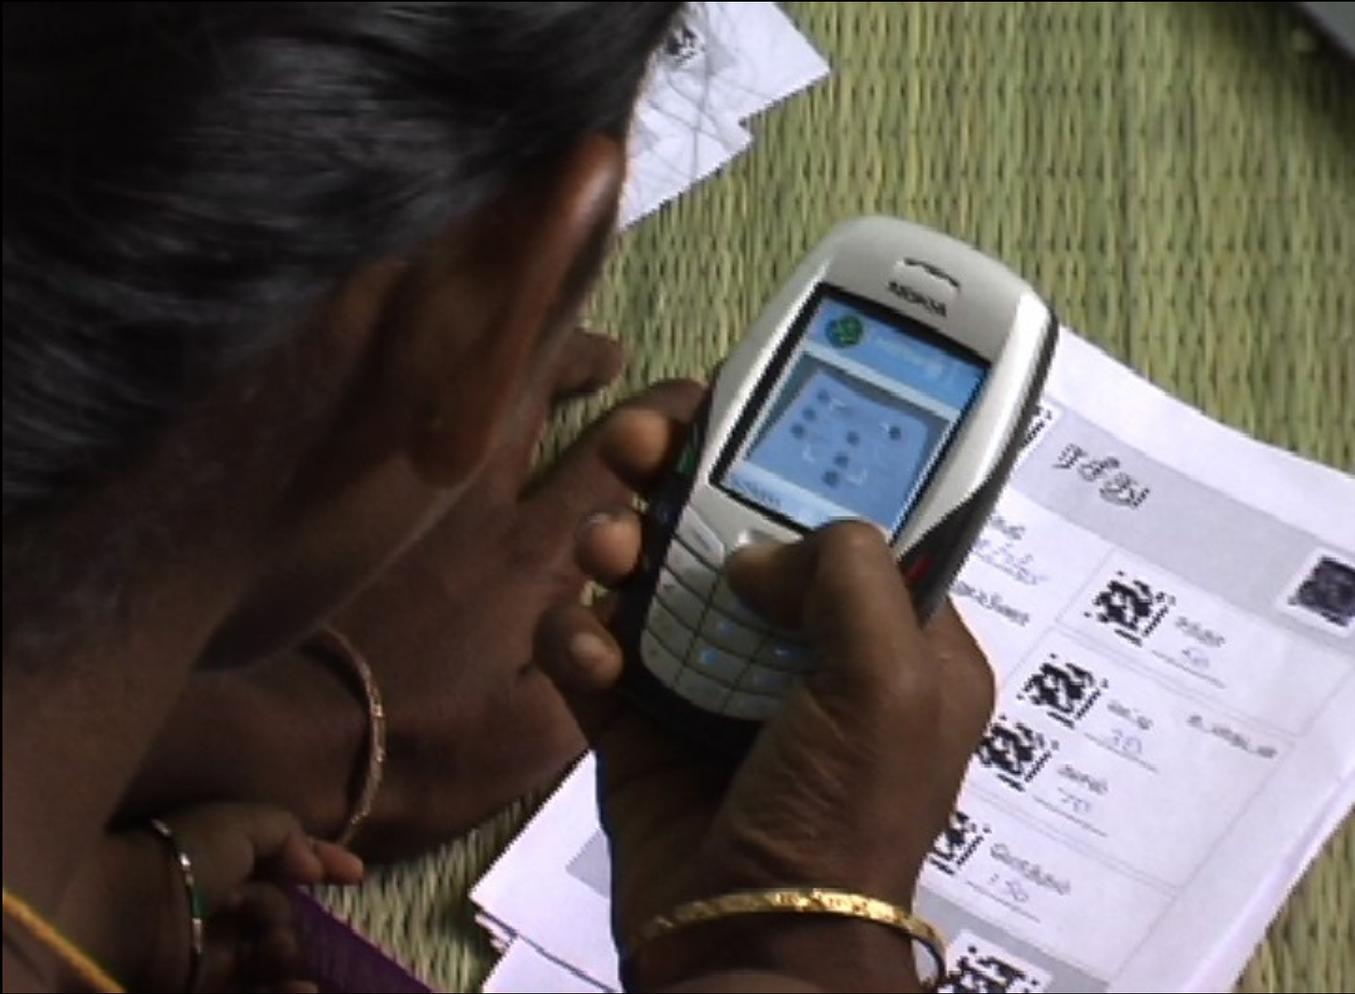

```
<function name="a_click">
  date = input_date("Enter Date" "date.wav");
  amt = input_int("Enter Amount", "amount.wav");
  message_note("Say your name", "sayname.wav");
  record_audio("name.wav");
  email("tap2k@yahoo.com", "a=#amt, "name.wav");
</function>
```

# CAM: Dataflow in Microfinance

- Framework for SHG data collection and reporting
- Increased transparency within SHG
- Improved documentation when applying for loans
- Provide new services to members (e.g. flexible savings)

ekgaon.com

# Step 3: Evaluate

2006-7

# CAM: Usability Evaluation

Parikh et al. - ACM CHI 2006

## **Task:** Record transactions during SHG meetings

- Users: 14 field agents from NGO
- 7<sup>th</sup> grade to college educated
- Simulated and in situ testing

## **Results:**

- Learnable: Learned within 1-3 sessions
- Efficient: 30 secs per form, 8-10 mins per meeting
- Accurate: Error rate < 1% (0% for in situ tests)
- Users performed significantly better with audio

# CAM: Impact in Microfinance

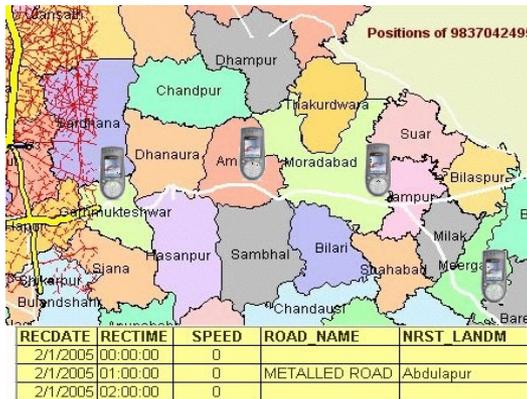

Commercialized by [ekgaon technologies pvt.ltd](http://ekgaon.com)

2 NGOs / 17 agents / 700 SHGs / 10000 members

In active use in Tamil Nadu since October 2006

[ekgaon.com](http://ekgaon.com)

## Supply Chain Javid and Parikh - ICTD 2006

- Monitor inventory at rural warehouses
- Track inflows and outflows of goods
- Plan collection & distribution

## Health Care Future Work

- Collect disease data
- Monitor incidence, transmission
- Monitor treatment compliance

## Agriculture Schwartzman and Parikh - MobEA 2006

- Monitor cultivation using pictures, audio
- Agricultural extension and certification
- Integrated with various sensors

Working with farmers in Guatemala and India

Extension staff collect geocoded video, images and data

Experts provide feedback and advice via parcel-wise blog

Enable remote certification – organic, bird-friendly, etc.

- Traceability
- Product Differentiation
- Land Use

# Understand, Build, Evaluate

Yael

# Future Work: Support Local Creators

35

Empower local people to build their own solutions

Physical tools for content creation and application development

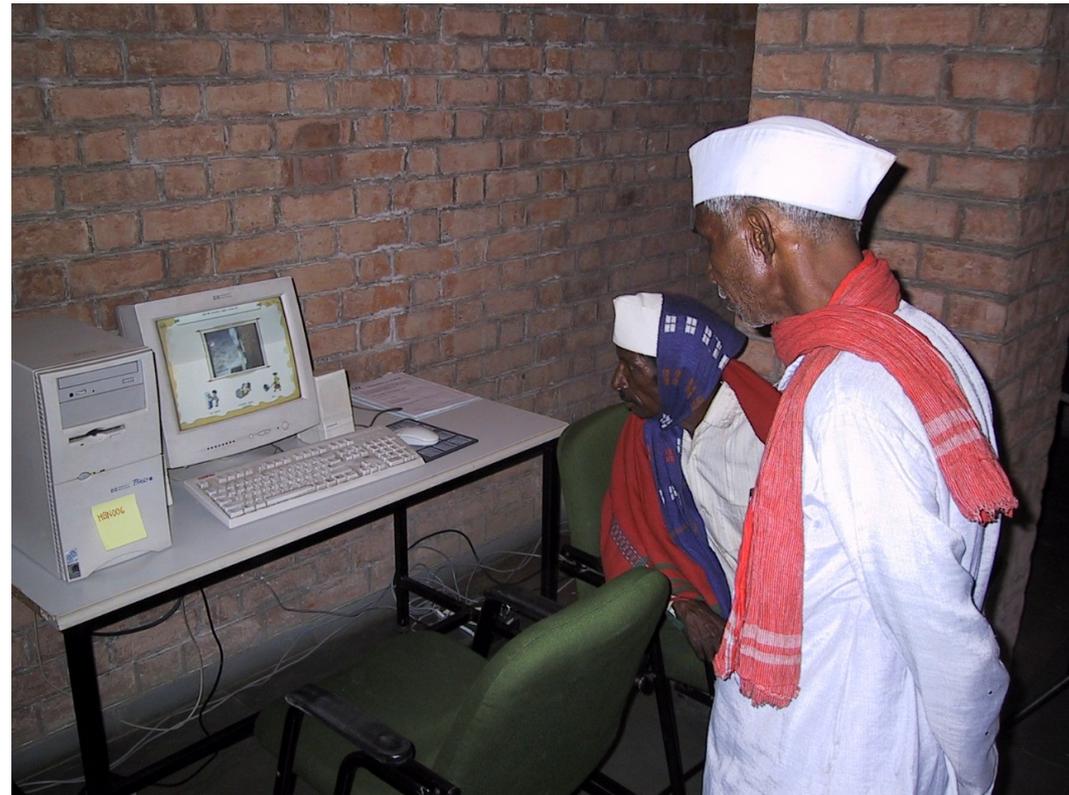

Paper formats, visual and tangible programming

Rural users may never “own” technology

How do different identification technologies, interaction mediums and social contexts impact trust in computing?

Can we facilitate distant personal / business relationships?

## TIER Group, UC Berkeley

- Long-distance wireless, DTN
- Mobile educational software

## Digital Studyhall, Princeton / UW / MSR

- Video for education
- Postmanet – physical networking

## Emerging Markets, MSR India

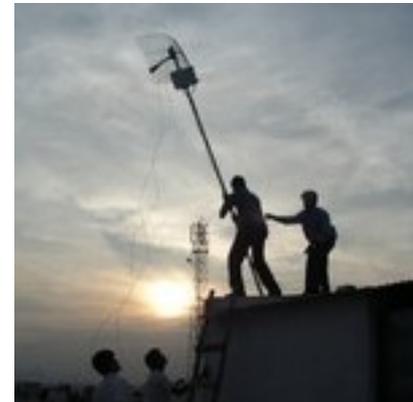

- Design for semi-literate users
- Multiple mice for education

## One Laptop Per Child (OLPC)

- Laptops for education

## Other Efforts

- MSR funded 17/162 proposals

Olaganathan, John, Bala, Swami, Muthu Velayutham, Edward Lazowska, David Notkin, James Landay, Gaetano Borriello, Richard Anderson, Ken Fishkin, Scott Klemmer, Kentaro Toyama, Eric Brewer, Greg Wolff, Batya Friedman, SRISTI, IIM-A, CCD, Mahakalasm, SEWA, Asobagri, Jataan, HLPPT, Media Lab Asia, HFI, UW CSE, VSD Lab, UW MLC, Intel, MSR India, Ricoh Innovations, David Bonderman, SEEP, IDRC, ekgaon and everyone else I've had the pleasure to work with.

# Knownet-Grin

Knowledge Network for Grassroot Innovators: A **Honey Bee** Project

- Honey Bee shares grassroots knowledge and innovation
- Publishes 7 regional magazines about agricultural practices and other innovations
- Interested in new ways to share content and facilitate communication
- Developed multi-media distributed database and communications application
- Networked using asynchronous CD-based updates
- Implemented at kiosks in Gujarat, Madhya Pradesh, Maharashtra and Tamil Nadu

# ekgaon technologies

ekgaon was founded in 2002 and works in providing technical, managerial and strategic support to community-led initiatives around India and the world. Currently we are based in New Delhi with a field office in Madurai, Tamil Nadu.

Microsoft Research  
Intel Education Program

## **E-Z Rural Computing**

Easy to Use: Max outreach

Easy to Teach: Word of mouth

Easy to Access: Travel is hard

Easy to Share: Amortize high costs

Easy to Create: Local ownership

Easy to Adapt: Localization essential

## **Outline**

- 1 Background: Microfinance
- 2 Contextual Design for Rural Users
- 3 CAM: Data Collection for Mobile Phones
- 4 Evaluation: Usability, Breadth, Impact
- 5 Future Work
- 6 Conclusions

## User Interface

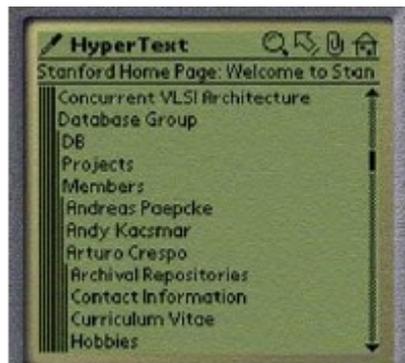

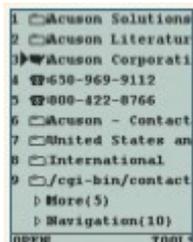

- Adapted point-and-click metaphor
- Text entry is difficult; limited use of other media

Mobile UI research has largely focused on improving display of web content on small screens

- WEST, PowerBrowser, Wingman, Digestor, AppLens, Summary Thumbnails, Collapse-to-zoom, etc.

## Programming Model

- Proprietary APIs and programming environments
- Web-based applications require online connection

# paper prototyping
